

Natural Advantage introduces **Natural alpha-ionone (FEMA 2594, CAS 127-41-3)**. Alpha-Ionone occurs naturally in Burley Tobacco, tea, and whiskey. It is best described as having the characteristics of warm violet, raspberry, woody, floral, and sage aromas. Due to its woody, piney or citrus characteristics, it is widely used in fragrances as well as tobacco and tea flavors. At certain dilution alpha-ionone possesses impressive cedar wood nuances. Recommended use level: 0.01 to 10 ppm as consumed.

EU and US Natural, Kosher, Non-GMO.
