

Natural Advantage introduces **Natural Furfuryl Mercaptan (FEMA 2493, CAS 98-02-2)**. Furfuryl Mercaptan is found in both coffee and cooked beef. Upon dilution, it can be described as burnt, caramellic, coffee, meaty, and savory. Specifically reminiscent of French roasted coffee, this natural Furfuryl Mercaptan would work great in applications for coffee, cocoa, chocolate, mocha, and roasted beef.

Recommended use level: 0.0001-0.5ppm

EU and US Natural, Kosher, Non-GMO.
