

Natural Bis(2-methyl-3-furyl) disulfide

Natural Advantage, LLC

www.natadv.com

Natural Advantage introduces natural **Bis(2-methyl-3-furyl) disulfide (FEMA 3259)**. This material occurs naturally in cooked beef and tea. Taste and odor is seared beef, onion, fermented vegetable and sauerkraut. Although typically used for meaty nuances, this product can also be used to add fatty notes to material as well as add creamy and milky effects at low dosage.

EU and US Natural, Kosher, Non-GMO
