

Methyl 2-Methylbutyrate, Natural
Natural Advantage, LLC
www.natadv.com

Natural Advantage introduces **Natural Methyl 2-Methylbutyrate** (FEMA 2719, CAS 868-57-5). This material occurs naturally in apple, orange, spearmint, melon, and strawberry. Methyl 2-Methylbutyrate can be described as having a sweet fruity ethereal odor reminiscent of a mixture of ripe berries and pulpy apples with hints of rum and nut nuances. With very sweet, fruity, and apple-like characteristics, this material can add juiciness and freshness to alcoholic beverages, specifically rums and brandy. Methyl 2-Methylbutyrate can be used to achieve flavors such as apple, citrus, strawberry, and tropical fruits. Recommended use levels are 0.1-10ppm.

EU and US Natural, Kosher, Non-GMO, Vegetarian
